- ◆ **Distribution**

CRT is a leader in creating integrated packaging from top brands in cosmetics, fragrance, HBA personal care, electronics, food and medical industries.

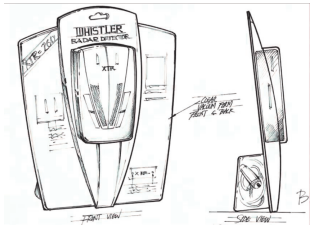

Custom Thermoforming

Our extensive and respected packaging expertise enables us to create the right packaging for any product.

Our custom thermoforming capabilities successfully satisfy all the packaging requirements for a diverse range of industries to include: Cosmetics, Healthcare, Electronics, Housewares, Food, Entertainment, and much more.

CRT produces a wide range of high-performance, cost effective thermoform packaging including: Blister Packages, Snap-Lock Packs, Clamshells,

Box Inserts, Food Packaging, Industrial Liners and Medical Trays in many types of materials.

Our inline thermoformers are capable of handling sheet sizes up to 42". The entire process is fully automated and computer-controlled, to produce accurate, high-speed pressure forming and vacuum forming using .007 to .080-mil stock. Capable of running HIPS, PVC, PET, PETG, RPET, as well as many others.

Rigid Set Box

With set boxes, nothing is more precise in their design and fabrication than fragrances.

CRT serves the leading manufacturers in this demanding industry.

From seasonal gifts sets to luxury packaging, CRT offers complete fulfillment from concept to final distribution.

We provide die-making facilities with all die cutting in house, allowing complete finishing with computer-controlled automatic glueing and shrink-wrap system, semiautomatic FMS box (quad, gluer, wrapper), scoring machines, and mitering.

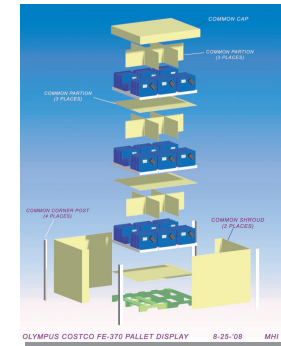

In every operation, CRT gives you painstaking attention to detail.

Meticulous control assures the highest quality in wrapping, fabric selection, border alignment, and even store specific labeling.

Contract Packaging

In contract packaging, a successful project means that all the elements must come together perfectly so the entire package works as an integrated whole, no matter how complex your requirements CRT is an expert in every aspect of full service packaging and distribution.

We offer our clients fully automated labeling, inserting, and shrink-wrap systems, inventory tracking reports, in-line fulfillment of thermoform and rigid set boxes. Our contract packaging offers you attention to detail and quality unsurpassed within the industry.

We offer special complex fixtures for hot stamping both one and two level forms. All our hot-stampers utilize hydraulic oil over hot air to ensure consistently superior images. We can also expertly preform any phase of packaging assembly to satisfy your specific needs. We make RF Heat Sealing simple and versatile.

From initial concept to collection and assembly, we go the extra mile to make certain everything runs smoothly and your project accomplishes your objectives.
